

01 / BRIEF & STATUS

Three looks. One brand.

Prepared for the POD production partner | Contact: Gary Dove | gdove90@gmail.com

Purpose: quote, reconstruct print artwork, confirm garment choices and prepare sample proofs for three GOOOL ATHLETICS T-shirt concepts. This packet is ready to send for supplier review. It does not authorize printing, ordering, billing or substitutions.

Style	Direction	Reference garment
GA-01 / Modern Sport	Bold sport wordmark; front and upper back	Solid black crewneck tee
GA-02 / Varsity	Collegiate arch; front and upper back	Washed black crewneck tee
GA-03 / Minimal Club	Small left chest; large upper back	Natural / cream crewneck tee

What the owner has established

Use the visible brand name **GOOOL ATHLETICS**. Spelling is G + O + O + O + L: **three O letters**. All three concepts remain in consideration; Varsity and Minimal Club are the owner's favorites. No final master-logo selection has been approved in this thread. Do not place "LLC" on the garment.

What is proposed in this packet

Print sizes, placement offsets, color targets, blank criteria, sample quantities and acceptance tolerances below are development proposals. Confirm them on a dimensioned supplier proof and obtain owner approval before a physical sample. Final bulk/POD release requires separate sample approval.

Critical file distinction

The three supplied PNGs are AI-generated visual references, not print separations. They contain garment photography, shadows and layout labels. Rebuild clean artwork; do not crop a shirt image and print it. No final vector masters, transparent production PNGs or licensed font files are included.

Packet map

02 Garments & scope | 03-05 Individual style sheets | 06 Placement & grading
07 Artwork deliverables | 08 Color & decoration | 09 Sample inspection
10 Supplier quote worksheet | 11 Approvals & file inventory

02 / GARMENTS & SCOPE

Blank and finish requirements

Treat these as **three T-shirt graphics/colorways**. A hoodie, hat, performance-fabric version or additional colorway is outside this request and needs a separate specification. The Modern Sport name describes the graphic; it does not approve a polyester performance blank.

Item	Proposed requirement / supplier response needed
Silhouette	Adult men's / suitable unisex crewneck; relaxed body; moderate dropped shoulder; opaque fabric; rib collar. Match the visual intent rather than promising exact mockup drape.
Fabric / weight	Proposed premium casual tee: cotton face, approximately 200-240 GSM. Return actual fiber composition, fabric weight, shrinkage information and decoration compatibility.
GA-01 black	Uniform solid black; avoid visible wash fading unless approved.
GA-02 washed black	Garment-dyed or comparable washed black appearance. Show actual blank swatch and variation between pieces; no distress holes.
GA-03 natural	Natural / cream / off-white. Supply actual color name and code. Do not substitute bright white without approval.
Blank selection	Vendor to quote manufacturer, exact model/SKU and supplier color code for each style. Prefer the same base fit where available; disclose differences. No blank is newly approved by this packet.
Size range	Planning range S-2XL, subject to owner confirmation. Supply manufacturer measurements and any size-dependent costs. Physical sample size is still TBD.
Labels	Quote stock labeling and optional GOOOL ATHLETICS private neck label separately. New label artwork is not supplied. Preserve required garment information; confirm your relabeling process.
Packaging	Quote standard individual POD packaging. State optional branded packing slip / mailer costs separately; no custom packaging approved.

Request current stock coverage, stockout handling, order routing and substitution policy. Written approval is required for any change to manufacturer, blank model, fabric, dye color or print process after sample signoff.

03 / STYLE SHEET

GA-01 | Modern Sport

Reference appearance only. Every listed measurement is a proposed sample target.

Solid black blank. Large white forward-leaning GOOOL across chest, red underline and smaller widely spaced white ATHLETICS underneath. Upper-back mark is white only; no red line.

Location / art ID	Visible artwork width	Placement target
Front / GA-01-F	11.00 in / 279.4 mm wide	Centered; top edge 3.00 in below front collar seam
Back / GA-01-B	3.25 in / 82.6 mm wide	Centered; top edge 2.00 in below back collar seam

Artwork notes: Preserve the rounded, extended athletic letterforms and compact vertical spacing. Keep all three O letters distinct. The red underline belongs only on the front. Do not add a swoosh, crest or slogan.

Height: proportional to the approved reconstructed artwork; supplier must state final height on proof. Width refers to visible ink bounds, not canvas or transparent padding.

04 / STYLE SHEET

GA-02 | Varsity

Reference appearance only. Every listed measurement is a proposed sample target.

Washed black blank. Arched collegiate GOOOL in warm ivory, with restrained dark red outline accents and dark negative space. Small ATHLETICS below, flanked by short ivory rules. Small ivory upper-back brand mark.

Location / art ID	Visible artwork width	Placement target
Front / GA-02-F	11.00 in / 279.4 mm wide	Centered; top edge 3.00 in below front collar seam
Back / GA-02-B	3.25 in / 82.6 mm wide	Centered; top edge 2.00 in below back collar seam

Artwork notes: Keep the arch, block serifs and thin red contour visible. Rebuild outline layers explicitly; confirm whether black detail is garment knockout or printed black. Any worn texture must be intentional in artwork and approved. Do not simulate garment wrinkles as distress.

Height: proportional to the approved reconstructed artwork; supplier must state final height on proof. Width refers to visible ink bounds, not canvas or transparent padding.

05 / STYLE SHEET

GA-03 | Minimal Club

Reference appearance only. Every listed measurement is a proposed sample target.

Natural / cream blank. Small black GOOOL over tracked ATHLETICS at wearer's left chest. Large black GOOOL and ATHLETICS across the upper back with a restrained red underline.

Location / art ID	Visible artwork width	Placement target
Front / GA-03-F	3.50 in / 88.9 mm wide	Wearer's left chest; center 3.50 in left of centerline; top 3.00 in below front collar seam
Back / GA-03-B	12.00 in / 304.8 mm wide	Centered; top edge 2.75 in below back collar seam

Artwork notes: Front has no red underline. Keep the back wordmark bold and clean, with ATHLETICS spaced across a similar width. The left chest is the wearer's left, which appears on the viewer's right in the front mockup.

Height: proportional to the approved reconstructed artwork; supplier must state final height on proof. Width refers to visible ink bounds, not canvas or transparent padding.

06 / PLACEMENT & SIZE GRADING

Measure the ink, not the canvas

Measurement convention

Lay the garment flat without stretching. Use the bottom seam of the rib collar at center front or center back as the vertical origin. Measure straight down the body centerline to a horizontal line through the highest visible printed point. For the left-chest graphic, use the same front origin and its specified horizontal center offset. Do not measure from the top of the rib or the shoulder seam.

Center-front and center-back graphics align to the garment body centerline. All widths cover the whole visible lockup, including any underline or flanking rules. Keep the artwork aspect ratio locked. Height is recorded after artwork reconstruction; never stretch letters to fill an arbitrary box.

Location	S-2XL starting proposal	Supplier must validate
GA-01-F / GA-02-F	One 11.00 in-wide print across sizes	Actual print area and chest/armhole clearance, especially S
GA-01-B / GA-02-B	One 3.25 in-wide print across sizes	ATHLETICS readability and minimum line/letter thickness
GA-03-F	One 3.50 in-wide print; 3.50 in left offset	Placement on S and 2XL; no crowding at armhole or excessive outer shift
GA-03-B	One 12.00 in-wide print across sizes	Max safe width on S and back platen restrictions

If one size does not fit safely

Return an exception proof showing the affected size, revised width and offset, and additional costs. Owner must approve any S-M / L-2XL grading split. Do not silently scale artwork per order. Provide dimensioned front/back proofs for S, the chosen sample size, and 2XL.

Proposed acceptance tolerances

Attribute	Target for supplier agreement
Position	Within +/-0.25 in (6.4 mm) horizontally and vertically of the approved location
Print dimensions	Within +/-3% of approved width and height, preserving aspect ratio
Rotation	No more than 2 degrees off approved alignment
Clearance	Propose at least 1.00 in from visible ink to seams/armholes; use a larger clearance if the chosen process requires it

These tolerances are proposed acceptance terms, not a statement of supplier capability. Declare exceptions in the quote before approval.

07 / ARTWORK DEVELOPMENT

Six clean print masters required

Supplier or appointed designer to reconstruct each front/back graphic from the reference. Exact fonts are not specified or licensed by this packet. Match the visual direction, disclose fonts used and confirm commercial print rights. Any font substitution or shape change requires a visual proof.

Art ID	Target width	300 PPI width*	Proposed palette
GA-01-F	11.00 in	3300 px	White + red
GA-01-B	3.25 in	975 px	White
GA-02-F	11.00 in	3300 px	Ivory + dark red; black TBD
GA-02-B	3.25 in	975 px	Ivory
GA-03-F	3.50 in	1050 px	Black
GA-03-B	12.00 in	3600 px	Black + red

*Pixel widths apply to visible artwork at the proposed physical size. Raster height must follow the approved aspect ratio. Do not upscale the supplied mockup to meet these dimensions.

Deliverables to return for approval

1. Editable vector master for each location (AI or SVG) with clean paths and outlined type; preserve an editable type version separately if licensed.
2. Print PDF for each location at 1:1 physical size, with outlined fonts and no garment photo.
3. Transparent PNG for each location at 300 PPI at final size, if accepted by the chosen workflow. Use the supplier's requested color profile and disclose it.
4. Dimensioned garment proof listing blank SKU/color, size, art width x height, collar offset, horizontal offset, decoration method and color references.
5. Source font names, palette definition, revision number and a file manifest.

Artwork preflight

Check exact spelling; verify transparency/knockouts; remove backdrop, garment shadows and concept headings; resolve stray points and unintended distress; confirm minimum strokes and counters at the smallest back print. Ask the printer to generate any process-specific white underbase or separations. Never add an underbase manually without its specification.

Version control

Use names such as **GA-02_Front_v01_PROOF.pdf**. After owner approval, issue a new clearly labeled production revision and list its matching proof. Keep obsolete revisions out of the fulfillment workflow. Production masters are a required next deliverable and are **not included** in this packet.

08 / COLOR & DECORATION

Color targets and print proposals

The following screen values are **proposed reconstruction targets**, not colors measured from the mockups and not approved Pantone matches. Approve physical output on the actual garment. Supplier to provide its closest reproducible ink/transfer values and color-managed proof.

Color role	Proposed screen target	Application
White	#FFFFFF	GA-01 front/back
Core red	#C52D32	GA-01 front underline; GA-03 back underline
Warm ivory	#E8DFCA	GA-02 front/back
Varsity dark red	#8E3438	GA-02 front outline accent
Black	#171717	GA-03 front/back; GA-02 printed black only if required

Decoration quote

Baseline proposal: DTF for both print locations on the selected cotton tees, subject to supplier capability and sample approval. Prioritize crisp type, opaque light ink on black and a flexible hand. Quote DTG as an optional comparison if it better achieves the appearance; list changes in hand, vibrancy, cost and care. Do not switch processes after approval.

Large solid graphics may feel heavier depending on the process. Flag expected hand-feel on GA-01 front and GA-03 back before sampling. For washed/garment-dyed blanks, confirm compatibility and any risk of dye migration, scorching or press marks. Supplier owns process settings based on the actual materials.

Fine detail and line treatment

Keep decorative lines proportional to the approved reconstructed graphic. As a starting proposal, use a core red underline around 0.10 in thick at full chest/back scale; finalize visually. Supplier must disclose its minimum line, gap and text sizes and show a 100% close-up of small ATHLETICS lettering and the Varsity outlines. Do not thicken, simplify or drop detail without approval.

Color approval record

Record actual blank color code, approved ink/transfer references, profile/workflow and dated sample photos. No device-screen image can serve as the sole physical color standard. Use the approved physical sample as the appearance reference for subsequent orders.

09 / PHYSICAL SAMPLES

Approve appearance and wear

Proposed sample request: one finished shirt per concept, three shirts total, printed front and back. This is a quotation request only. Owner must confirm sample sizes, quantities, shipping details, price and artwork proofs before samples are ordered.

Check	Acceptance / evidence requested
Identity	Correct GOOOL spelling with three O letters; ATHLETICS spelled correctly; no LLC, unapproved slogan or mockup heading.
Blank	Actual manufacturer, model, color, size, fabric and weight match the approved proof; no unapproved replacement.
Geometry	Measure print width, height and collar offsets with a ruler. Verify centerline / left-chest placement and agreed tolerances.
Print finish	No lifting edges, unwanted cracks, pinholes, exposed underbase halo, adhesive residue, heat damage or visible press rectangle. Intentional approved Varsity texture is exempt from crack-free solid-ink expectations.
Fine type	ATHLETICS remains readable at small back/chest scale; letter counters open; red contours and fine rules intact.
Color / feel	Match approved physical references; record opacity and fabric show-through. Owner evaluates softness, print feel, drape and overall fit.
Wash review	Proposed owner test: five wash/dry cycles according to the supplied care instructions. Photograph before/after; check lifting, cracking, color loss and distortion. Record chest/body dimensions before and after; compare with the supplier's declared shrinkage allowance.
Fulfillment	Check folded presentation, label information, packing slip accuracy and packaging. Send care instructions for the chosen blank/process.

Photos and records

Provide full front/back photos on a flat surface, detail crops of every print, collar/label photos and ruler photos of placements. Use neutral lighting with no filters. Record sample date, order ID, blank lot if available and artwork revision. Keep one approved physical reference or agree an alternative standard.

When a sample fails

Document the issue against the approved proof and agree the correction/re-sample plan before fulfillment is enabled. Ask the supplier to state its remedy and reprint policy in the quote; this packet does not presume acceptance of commercial terms.

10 / SUPPLIER REPLY

Quote and capability worksheet

Please return the following information for each style. A fill-in text response sheet is included in the ZIP. Quote in your stated currency, separating taxes and delivery. Do not treat this request as a purchase order.

Quote line	Response needed for GA-01, GA-02 and GA-03
Blank	Manufacturer/model; color name/code; actual fiber/weight; size chart; fit; available size range; stock position; alternate option identified separately.
Decoration	Method per location; maximum print dimensions; minimum detail limits; color/profile requirements; placement tolerances; achievable match to each reference.
Artwork setup	Reconstruction cost per graphic; six locations in total; included revisions; vector/source-file ownership and delivery; any font licensing costs.
Sample pricing	Blank + front print + back print + optional label + setup + shipping + tax; final sample cost per style; sample production lead time.
POD unit pricing	S, M, L, XL and 2XL costs; front/back print costs; label/packing costs; fulfillment fee; any platform or subscription fees.
Shipping	Origin and destinations supported; first/additional item rates; combined shipment of mixed styles; tracking; average dispatch and transit estimates.
Operations	MOQ if any; stockout handling; order integration options; address/order change cutoff; artwork revision control; return/reprint and defect reporting policies.
Approval / timing	Proof turnaround; sample production time after approval; time to enable POD; quote validity; payment terms; written exceptions to this specification.

Supplier acknowledgment

Company / contact: _____

Email: _____

Quote reference / currency / valid until: _____

Exceptions attached: yes / no Date: _____

Recipient and POD account details are intentionally unfilled. Owner will supply the final business/billing name and shipping address; a legal entity name change is not verified by this design packet.

11 / RELEASE CONTROL

Approvals and file inventory

Required decisions before sampling

Confirm the exact blank and color for each style; final sample sizes/quantities; reconstructed typography and all six print files; final dimensions and offsets; method and physical color targets; label option; total sample price and delivery address. The supplier must flag deviations rather than silently resolve them.

Two separate approval stages

Stage	Owner approval record
A / Sample authorization	Approved proof revision(s): _____ Blank SKU/color per style: _____ Sample sizes/quantities: _____ Accepted quote / total: _____ Owner name / date: _____
B / Production release	Physical samples accepted: _____ Final production artwork revisions: _____ Approved sizes/colorways: _____ Authorized POD launch or order reference: _____ Owner name / date: _____

Approval of a concept image alone is not production release. Any change after signoff to artwork, blank, placement, color or process requires an updated proof and approval appropriate to that change. No approval has been prefilled.

What is included

File / folder	Use
GOOOL_ATHLETICS_POD_Packet_v1.pdf	This supplier brief and technical development specification
Reference_Mockups/01_Modern_Sport.png	Original front/back concept reference
Reference_Mockups/02_Varsity.png	Original front/back concept reference
Reference_Mockups/03_Minimal_Club.png	Original front/back concept reference
Supplier_Response_v1.txt	Editable quote and approval response fields
README.txt	Handoff status, extraction instructions and missing artwork list

All three reference images are 1536 x 1024 pixels. No standalone print logo, vector master, font license, embroidery file or private-label artwork is included. Archive folder: designs/goool athletics/POD_Packet_v1/.
